Quilt Preparation

If you have washed your fabrics, make certain that your backing has also been washed.

Pressing often determines how your quilt turns out, so be certain that the top and back are pressed. Any loose threads should be carefully snipped and removed.

Your backing and batting needs to be 3" larger *all the way around* than your quilt top, and should be squared. If using wide-back fabric, please have torn edges rather than cut edges, so that the grain of the fabric loads straight and keeps the completed quilt squared. Crooked backs make crooked quilts!

Preparation Services: \$15.00 per hour. These include but are not limited to pressing, seam repairs, clipping threads, piecing backing, and hanging sleeves (using your supplied fabric). **Important:** Please indicate if you want any of these additional services, otherwise your project will be quilted exactly as it was received!

Pricing

To determine the square inches for your quilt, multiply the length of the quilt times the width of the quilt to arrive at the overall area in square inches.

Multiply total square inches by \$0.02 for an all-over design, **or** \$0.03 for a custom design, **or** \$0.03 + for interpretive quilting *.

* All-over – A single edge-to-edge design, over the entire quilt (including borders). Samples of a few of the hundreds of available designs are shown on the opposite side of this leaflet.

* Custom – A single pattern in the main portion of the quilt, and a different pattern in a single border.

* Interpretive – Create or adapt quilting designs to highlight your work, including stitch-in-the-ditch, blocks, sashings, and/or extra borders.
